

F22 51. A method of preparing a graft prosthesis for insertion into a body passageway comprising the steps of:

B2 providing an expandable member having an interior surface defining a longitudinal passage;

and

providing a tissue adjacent to the interior surface of the expandable member.

F37 68. An assembly for insertion into a body passageway comprising:

B3 a deformable member having an interior surface defining a longitudinal passage; and

a tissue disposed adjacent to the interior surface of the deformable member.

58 D17 B4 96. A method of preparing a graft prosthesis for insertion into a body passageway comprising the steps of:

providing an deformable member having an interior surface defining a longitudinal passage;

and

providing a tissue adjacent to the interior surface of the deformable member.
